

Cartridges Filter PESGF

Polyethersulfone and Glass Fiber Cartridges Filter

Extremely Long Service Time

SteriPure-G cartridge filters feature a unique combination of asymmetric Polyethersulfone membranes and sub-micro glass fiber layers. A combine of well-defined retention efficiency and high total throughput capacity make them ideally suited for liquid containing particle and colloids. SteriPure-G can guarantee the microbiological stability of the liquid with a low adsorption of protein, polysaccharide and polyphenol. They will be the sufficient condition for the stable operation of filtration system.

Reliability: From raw materials purchase, transport and storage to production, all operations follow ISO 9001 quality management system. SteriPure-G manufactured, tested and packaged in a cleanroom to ensure product cleanliness. Each individual filter is flushed by DI water and integrity tested.
