## Membrane Filters Polivinilidenedifloride PVDF

These filters are manufactured with Polivinilidenedifloride polymer (PVDF). They are hydrophobic in nature and have a high temperature resistance. Dorsan ® also offers hydrophilic PVDF version. Designed to have high pressure resistance, flexibility and chemical compatibility. This membrane is highly valued for its ability to meet the highest requirements requested in the different applications of chemical filtration. Without the need for wetting agents this product is a good value alternative to PTFE membranes in applications to prevent moisture locking gas leaks or ventilation. Not recommended for use with acetone, DMF, DMSO or Bases > 6N.

### Features

- Hydrophobic or Hydrophilic version
