Cellspin Paper

Cytocentrifuges and Cellspin paper

Dorsan® presents an excellent quality for the absorbent paper used into the cytocentrifuges of blood analysis at hospitals and laboratory research.

Centrifugation is an indispensable technique for the diagnosis and cytological observation. Examine fluids can be centrifuged without any pretreatment. Total absorption of the liquid by filter paper allows the use of conventional fastening techniques, staining and examination of the cells.

Different sizes with different number of perforations are available in our offer of products.

Features

Wide range of sizes
Excelent relation Quality/Price
High Quality Fibers
